WORK EXPERIENCE

Coco grid
Design Engineer — Aug 2026 - Present

- Contributed to design engineering workflows by translating Figma UI kits into reusable React components to improve design-to-code consistency and reduce repetitive frontend development effort.
- Researched AI-assisted development workflows to enable AI coding tools to discover and reuse existing design system components rather than generating duplicate UI implementations.
- Explored integration approaches for distributing React component libraries through GitHub repositories and npm packages for consumption by Figma Make and other AI-powered code generation tools.
- Investigated Figma Make's design system integration capabilities, including npm package installation, library styles, Figma Code Connect, and Model Context Protocol (MCP), to identify effective ways to connect design assets with code-level components.
- Evaluated AI coding tools and their repository-context capabilities to identify workflows for generating application screens using established React components and design system conventions.
- Worked with design tokens and JSON-based token structures to maintain consistency between Figma variables, CSS custom properties, and React component styling.
- Researched AI-readable documentation and instruction strategies to improve component discoverability, encourage design system reuse, and maintain consistent UI output across AI-assisted development workflows.
- Explored design system architecture and component distribution practices to establish a scalable foundation for reusable UI development across multiple projects and AI coding environments.

CocoGrid
UI/UX Designer Apprentice — July 2025 - July 2026

- Designed responsive web and mobile interfaces in Figma following typography, layout, color, and accessibility best practices.
- Created wireframes, user flows, and interactive prototypes for product features.
- Created reusable UI components and maintained a scalable design system to ensure consistency across products.
- Supported user research activities and translated insights into design improvements.
- Collaborated with designers, developers, and stakeholders in an agile startup environment.

KGIS
Junior Process Associate(Trainee) — Oct 2024 - Dec 2024

- Trained in professional communication and active listening skills.

EDUCATION

Dr G.R.Damodaran College Of Science
Master Of Computer Applications - 8.12 CGPA — Nov 2021 - May 2023

PSG College Of Technology
B.Sc Computer System and Design - 7.33 CGPA — June 2018 - June 2021

PROJECTS

Personal Learning Tracker – UX Research & Product Design Project

- **Description**: Identified a common challenge among UI/UX apprentices in retaining and tracking learned concepts. Conducted user interviews, analyzed learning workflows, and designed a concept solution to help users organize, revisit, and monitor their learning progress.
- **Impact**: Addressed a real user problem by creating a structured learning management experience that improves knowledge retention, progress visibility, and long-term learning consistency.

Mathmos App – UI/UX Case Study

- **Description**: Identified an opportunity for Mathmos to expand its digital experience through a dedicated mobile app. Designed a concept app in Figma featuring product discovery, customization, user flows, wireframes, high-fidelity screens, and a reusable design system.
- **Impact**: Proposed a user-centered solution that enhances product discoverability, streamlines customization, and extends the brand experience beyond its existing digital channels.

Home Manager Mobile Application

- **Description**: Developed an APK to manage reminders,short-term tasks and a Digital Locker for securely storing encrypted images, Integrated news using Android Studio, Google Firebase.
- **Impact**: Enhanced task management for users with 90% adoption rate during testing.

Chat Web Application

- **Description**: Built a real-time chat platform with features of messaging, voice sharing and file exchange using the Django framework,SQLite.
- **Impact**: Improved communication and collaboration with real-time messaging, leading to increased user engagement and 90% adoption rate during testing.

SKILLS

- **Programming Languages:** C, C++, Java, Python,
- **Web Technologies:** HTML5, CSS3, JavaScript, PHP,React.js,Express.js,Node.js,Bootstrap,Tailwind
- **Database Management:** Oracle, MySQL, SQLite,MongoDB
- **Tools:** Android Studio, Visual Studio Code,Selenium, Figma, Adobe Photoshop
- **UX Design**: User Research, User Interviews, User Flows, Wireframing, Information Architecture, Design Thinking
- **UI Design**: User Interface Design, Responsive Design, Visual Hierarchy, Interaction Design, Typography, Color Systems,Visual Design, Layout Design, Grid Systems.
- **Design Systems**: Design Systems, UI Kit, Component Libraries, Prototyping

CERTIFICATIONS

NPTEL SWAYAM Cyber Security Certification.(2022)
Complete Web & Mobile Designer in 2023: UI/UX, Figma, +more.(2023)
